

Water study trips

a water study trip is :

- a week's **active learning** and meetings with the different protagonists involved in the management of water in a **territory**
- an objective of **citizenship education** and the **involvement** in the local management of water
- motivating group **production** and **collective works**

from 2007 to 2011,
the partnership agreement between Agricultural Education and the Seine-Normandy Water Agency has made possible :

- the carrying out of **75** water study trips for *students*, **5** water study trips for *farmers* and **3** *international exchange programs* water study trips

- the publishing of **log books**
